

INFORMATION SECURITY POLICY

Information Security Management System in **Switch Climate Tech Private Limited** aims towards maintaining confidentiality, integrity, and availability of information pertaining to the company and its clients, preserve the rights of ownership to intellectual property, use company information for authorized uses only, ensure timely and authorized access to use of reliable data and information technology resources of the company.

We shall ensure that:

- A company-wide approach to information security is established.
- Risk assessment is carried out for all information related processes and will be monitored and updated on time-to-time basis.
- Legal requirements and other customer specified requirements related to information security are identified on continuous basis and they are complied with.
- Information related assets including infrastructure and utilities are maintained to ensure their uninterrupted availability.
- All the employees are made aware of their information security-related responsibilities including reporting of incidents.
- Appropriate actions are initiated for responding to internal and external complaints and queries.

Mr. Vinayak Satpute

Director
